

SPORT BUDS BLUETOOTH WATERPROOF EARBUDS

Part# MVASBBT1
Instruction Manual

Please Read All Instructions Carefully
and Retain for Future Use.

fins up!

Nice score on getting the MTX Margaritaville Audio Sport Buds! These sweet ear buds are great for lounging around the pool, rocking in your kayak, or even a workout if you have to! The Sport Buds allow you a hands-free Bluetooth solution for both music and smartphone usage. Their splash-proof design allows you to use them typically where you don't want to get your phone wet or tied up in cables. Whether you are in the spa or on the treadmill, you can take MTX Margaritaville Audio with you! The compact design and wrap around flex fit is just the right size & snugness to stay on in place yet still being comfortable. Even when you are jamming the tunes via the wireless Bluetooth from up to 30 feet away, you can take a call with the hands-free function or just change music tracks if you like. There is an integrated microphone so it also works the phone just as good as if you were in the office or dangling your feet off the dock...

Things Not to Do

As always here are some tips to prolong the life of your purchase and keep you from potentially destroying them! Do not throw or submerge in water. These are "splash-proof" and not intended for underwater covert operations! Sure these are for the outdoors but never leave electronics in direct sunlight, near open flame or attempt endurance testing on dolphins. Never open unit up. Internal battery & tiny high tech electronic things are wedged inside and there is no room for you... Stay out! Even if you can change the oil on your car, do not bust these open. Internal parts are NOT user serviceable. This type of abuse is never covered under warranty, ever.

Things to Do

All internal battery electronics should be fully charged before use. Use the included mini-USB cable to charge. Plug them in when you first open them until they are fully charged, then unplug. This will prolong battery life. Use unit until recharge is required. This keeps batteries happy. Enjoy your new Bluetooth ear buds & turn them up! Just keep in mind moderate levels prolong listening time and reduce distortion caused by over cranking the volumes on both your smart device or the Bluetooth ear buds. Make sure you read the rest of the "operational" control instructions for each function below. That's it! You have been schooled enough through the University of MTX Margaritaville Audio. Now go enjoy some tunes at the gym or on your pool float! Fins up!

Charging Your Sport Buds

Simply plug in Sport Buds via the Mini USB located under the "flap" this is located on the tip of the right side (MTX logo). Red LED will illuminate and stay lit until fully charged. Ear buds will always turn themselves off when charging. Charge fully before use!

Before Using

Your Sport Buds need to be paired with your Bluetooth device.

1. With Sport Buds fully charged (but powered Off), make sure your mobile device is On & Bluetooth function is available.
2. Make sure Sport Buds are Off, then keep pressing multi-function button "0-" until light flashes blue & red alternately to enter pair mode.
3. To pair Sport Buds with Mobile Device, "MVA Sport Buds" will appear under "devices" in your Bluetooth menu. Select "MVA Sport Buds". If a password is requested use "0000", some devices may not require one.
- 4) To pair a second device, turn Off the first mobile device's Bluetooth function. Restart Sport Buds and pair with second device. Turn first device's Bluetooth back On.

(While 2 mobile devices are connected, one mobile is on the phone, the other device has incoming call just press & hold the multi-function "0-" button to answer.)

Controls

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, this is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a different circuit than the one to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Mitek Corporation could void the user's authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
