Please Read All Instructions Carefully
and Retain for Future Use.

fins up!

Rechargeable Sound Shot™ Bluetooth Speaker

This is a portable Bluetooth speaker for your smartphone, tablet, or notebook. It is lightweight, small in size but has a stunning sound. You can use it for up to 3 hours with a fully charged battery. Hooray!... you will be the hit of the party!

Before You Start

The Sound Shot™ will first need to be charged before it can be used. Connect the USB cable to a computer and then to the speaker. The Sound Shot™ can also be charged with any USB power port charging device via the USB cable.

The indicator light will turn red while the battery is charging, and will turn off when the battery is fully charged. Charging times can last up to 3 hours... but it will be worth it!

Bluetooth Connection

Ensure the Sound Shot™ is turned on by holding the PLAY/PAUSE button for 4 seconds. A voice alert will play from the speaker and the indicator light will blink blue.

Search for Bluetooth devices using the connection settings on your smartphone, tablet or computer. To pair, select "BT" on your Bluetooth searching list. When the pairing name MVA Sound Shot appears on the menu, select it. No activation code is required. A voice alert will indicate when the connection is made.

**Almost
Actual
Size!**

Media Control and Hands-free Function

1. The buttons for media control and hands-free are located underneath the Sound Shot™ speaker.
2. Short press PLAY/PAUSE to play and pause the music.
3. Short press PREV TRACK to play previous song and short press NEXT TRACK to play next song.
4. Hold PREV TRACK to lower the volume and hold NEXT TRACK to raise the volume.

The speaker also indicates when a phone call is being received.

1. Answer by pressing the BT/CALL button and by talking into the built-in microphone.
2. When the phone call is over, press the BT/CALL button again to hang up.
3. Double press BT/CALL to redial the last call.

Connection via Cable

Ensure the Sound Shot™ is turned on and simply connect a 3.5mm audio cable to the smartphone, tablet or computer and then to the speaker. The speaker will work automatically without further installation.

How To Use Photo Remote / Selfie Mode

First, turn on the Sound Shot™ by holding the PLAY / PAUSE button down for four seconds.

When the indicator flashes red and blue, the Sound Shot™ is in pairing mode. Enable Bluetooth on your phone or tablet and select MVA Sound Shot from the list of nearby devices. If previously connected, the Sound Shot™ may auto pair already! No fuss no muss!

The Sound Shot™ will indicate when it's connected so there are no surprises!

You can now use the Sound Shot™ shutter button with your favorite camera app, just like the shutter button on your phone or tablet.

Make sure your device is in camera mode (forward or self-facing camera mode)

The Sound Shot™ shutter button is activated when you press the "BT/CALL" icon

*On some Android devices the built-in camera app may not be compatible with Sound Shot. Download "Camera 360" from the Google Play store to enable Sound Shot™ support.

Specifications

Note:

Battery life & charging time may vary, based on usage & types of devices used. Abuse is never covered under warranty and no one likes a party pooper.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, this is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a different circuit than the one to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Mitek Corporation could void the user's authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
