Please Read All Instructions Carefully
and Retain for Future Use.

fins up!

Congratulations on getting your hands on the MTX Margaritaville Audio Concert Caddy! This is going to be your favorite, go anywhere multi-function music player ever. Not only is the Concert Caddy a portable Bluetooth speaker, but it's also a portable power bank recharging station for your smart devices utilizing a 5V USB power port. This speaker was specifically designed for those music lovers on the go who need to keep the party going along with a little recharge. Whether you are by the pool, on the beach, or at a tailgate party in Margaritaville, you have the perfect party solution with you. The Concert Caddy is the just the right size & power to keep you going. Even when you are jamming the tunes via the wireless Bluetooth from up to 30 feet away, you can take a call with the hands-free function, or just change music tracks if you like. There is a built in microphone so it also doubles as a conference phone just in case you have to pretend you are at the office & not the beach!

Things Not To Do

We don't want to sound bossy and we are not your mother... but here are some common sense things the Lawyer said we should tell you: Do not throw or submerge in water- This is "splash-proof" and not intended for your next SCUBA dive. Sure this is for the outdoors but never leave electronics in direct sunlight, near open flame, or on the BBQ grill. Never open unit up. Internal battery & high tech electronics are sophisticated things and should not be tampered with. Even if you can fix a toaster or you have a fancy degree, internal parts are NOT user serviceable. Sorry Einstein! This type of abuse is never covered under warranty ever. Read on...

Things To Do

All internal battery electronics should be fully charged before use. Plug this thing in when you first unwrap it until it is fully charged, then unplug. This will prolong battery life. Use unit until recharge is required. This will keep the battery happy and ensure its long life. Enjoy your new speaker & turn it up! Just keep in mind moderate levels prolong listening time and reduce distortion caused by over cranking the volumes on both your smart device and the Bluetooth speaker. Make sure you read the rest of the "operational" control instructions for each function below. That's it! You have been schooled enough through the University of Margaritaville Audio. Now go enjoy some tunes and take a well-deserved tropical vacation with your MTX Margaritaville Audio speaker!

Concert Caddy Controls & Features

Your Bluetooth device must support AVRCP in order to operate remote functions (AVRCP is fancy electronic talk for Audio/Video Remote Control Profile)

Turn Power On/Off

Hold power button (Ⓟ) down for 3 seconds.

Bluetooth Pairing

Select "MVA Concert Caddy" in your Bluetooth menu on your smart device.

Play Your Music & Start the Party

Press play on either your music player or the Concert Caddy - Dance like no one is watching!

Select Tracks

Short press + or – buttons to play previous or next track.

Adjust Volume

Long press + or – buttons to increase or decrease volume.

Answer Call or Pause Music

Press the "phone" button to pause music or take a call.

How to Charge Other Devices

Simply plug devices in USB port on rear for DC 5V 500mA.

How to Recharge Concert Caddy

Charge via the Micro USB & included cable from any USB power port. Battery indicator lights (4) on rear show charge status.

AUX In Mode

Automatically switches to 3.5mm when cable is plugged in.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, this is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a different circuit than the one to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Mitek Corporation could void the user's authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
